

The Flight Head 6 is the regular design of Gyro Stabilised Flight Head from Filmotechnic. But we have the Flight Head 6s. It is a unique head and the only head like this in the world. It has slip rings on all axes. Also on the roll axis so you can keep rolling unlimited 360°! It has a fantastic reputation as the 'go to' head for high speed tracking on the U-Crane and is fitted with the latest GPS Auto Horizon that is rock solid in the high G turns. Due to its full size design it is ideal for quickly mounting fully rigged camera without the need for moving any of the accessories. It can be used on any full size camera crane, jib arm, tracking vehicle, dolly, cablecam that is rated to take the weight. The Flight Head 6 can be controlled by either hand-wheels, joystick or optional pan-bar and it can be rigged in under or overslung configuration.

SPECS
