

The Sam-Dolly is our self-developed travel-cam. It is suitable for all common travel-shots, even completely wireless if desired (for example on a fully enclosed circular track).

The speed, acceleration, deceleration, sensitivity and smoothness can be adjusted to suit.

The tracks can be custom made or bent in the right curve to precisely fit around your set.

SPECS

Max Payload	20 kg (44.09 lbs)
Max Speed	3.90 m/s (12.8 ft/s)
Dolly Length	1031.2 mm (40.59 inch)
Dolly Width	460 mm (18.11 inch)
Dolly Weight	36 kg (79.37 lbs)
Fixed Columns	Yes
Electric Column	Yes
Max Lift Range	1700 mm (66.93 inch)
Min Lift Range	1100 mm (43.31 inch)
Vertical Travel	600 mm (23.62 inch)
