

The MAT Tower-Cam XL is the super long version of the standard Tower-Cam. The maximum height of the camera is almost 10 m. It can support heavy cameras and lenses and the system works precisely and silently.

The Tower-Cam XL is a very compact system though it can lift the camera to a very high position. The operator can use pedals or a hand operator, like all other Tower-Cam's.

SPECS

Max Payload (Head + Camera)	45 kg (99.21 lbs)
Max height	9.5 m (31.17 ft)
Min height	2.8 m (9.19 ft)
