

## STABILIZED HEADS

The FLIGHT HEAD CL is a new generation of lightweight camera remote heads. It compensates an angular vibration of camera ensuring very stable and very smooth images throughout 25-400 mm (film lens) zoom range. The CL can be mounted underslung or over-slung on a wide variety of regular or telescoping camera cranes, dollies, camera cars, vibration isolators, quad bikes, helicopters and cablecam rigs, etc. The system offers a horizon control (true horizon) under extreme shooting conditions. Wireless capable. Operated with hand wheels or joystick.
